

TCS and D-FLEX™ (Flexible Denture) PucheDental

Material Manufacturer

Myerson Duraflex™

TCS

Brief Description

A premium thermoplastic flexible partial denture that is natural looking and comfortable, thin and translucent.

Benefits for Doctor's Office

- Won't absorb moisture
- Stain and odor resistant
- Easy to adjust, polish, repair, or add teeth
- Practically unbreakable
- Available in 5 shades, including clear
- Clear clasps available

Benefits for Patients

- Natural looking – blends in with your smile
- Comfortable – lightweight and flexible

- Reliable – virtually unbreakable material with years of clinical service

What to Send Laboratory

Full arch impression (custom tray) and bite registration

Indications

- Temporary partial denture
- Small to medium size full removable denture

Contra-indications

- Not intended for long-term use or as a replacement for metal cast partials
- Unilateral partials

Preparation Instructions

Standard procedures, except that the flexible clasp material is able to engage a deeper undercut than a cast chrome clasp. The occlusal rest preparations cannot be utilized so a lingual blanket major connector must be used to ensure adequate stability during function.
